# Habasit – full-range belting supplier for the tire industry

## Habasit – solutions for all belting applications in the tire industry

The Swiss-based belting manufacturer Habasit is world market leader in power transmission, lightweight conveyor and processing belts. The company is the full-range belting supplier and solution provider for the tire industry. Full-range supplier means that Habasit is the only company to offer rubber processing belts for mixers, dip tanks, cooling lines or conveyor belts for the handling of uncured rubber and finished tires. Habasit's offering includes fabric-based rubber processing and conveyor belts as well as plastic modular belts.

For tire manufacturers, this brings about several benefits as they have only one contact to deal with. Having one single service partner for all belts reduces not only the administrative complexity of the purchasing process but also its costs.

As a solution provider, Habasit offers not only high quality products to the customer but also many different services. With a worldwide network of affiliated companies and service partners, Habasit is in a position to grant expert support to its customers wherever they are.

## Habasit Extraline belts – high temperature resistance for the handling of uncured, hot rubber

- Excellent rubber release properties due to special non-stick belt surfaces
- Folded edge concept to reduce the risk of rubber contamination
- Extended belt life, lower downtimes and reduced costs thanks to good chemical resistance and high temperature resistance

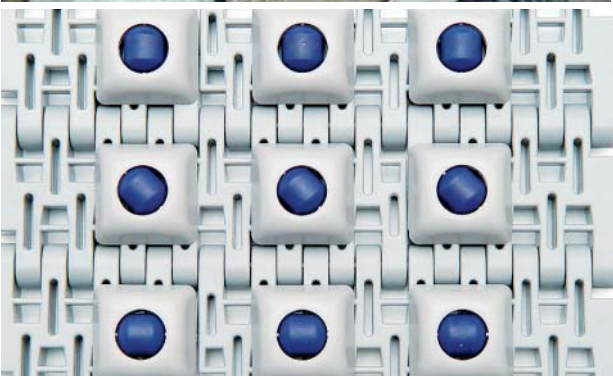

## HabasitLINK® Flush Grid belts – the solution for cooling lines

- HabasitLINK® Flush Grid belts for reduced line downtime and maintenance, less contamination risk and lower replacement costs.
- Excellent rubber release properties, no sticking of rubber
- Big open area for efficient cooling

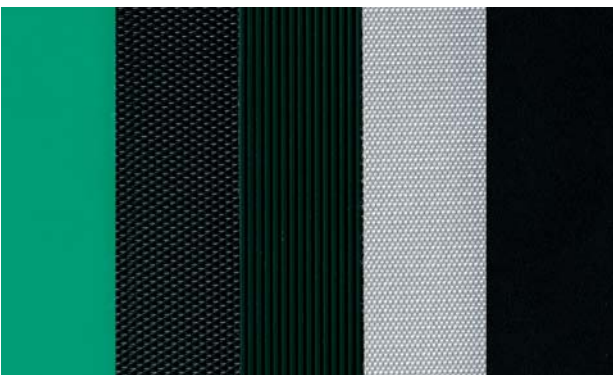

## HabasitLINK® Raised Rib belts for dip tank applications

- Perfect release of rubber from belt, no sticking
- Finger plates available for easy rubber transfer to next belt
- Use of highly chemical resistant materials
- Perfect rinse of dipping solution

## HabasitLINK® Roller Top belts – unique solutions for tire handling

- Roller Top belts with 0°, 45° and 90° rollers reduce line pressure and power consumption.
- Maintenance, unscheduled downtime, scrap, and jams are no longer an issue
- Replacement of individual modules leading to lower maintenance and inventory cost
- Use of high-strength materials especially suitable for demanding applications

## A wide range of fabric belts for a variety of different finished tire applications

- Habasit nonwoven conveyor and processing belts for the rough working conditions in tire handling whenever an extremely durable belt with excellent damping properties is needed
- TPU coated conveyor and processing belts with abrasion-resistant and durable materials for demanding applications
- PVC conveyor belts with a variety of surface characteristics, structures and classes of strength, for the reliable and economic transport of finished tires
