

- HabasitLINK® advantages at a glance:**
- The utmost in safety for skiers thanks to heavy-duty materials and optimized surface structures.
 - Very low maintenance costs and reduced risk of damage owing to patented anti-icing construction
 - Higher transportation capacities and enhanced operating reliability due to high-strength belt design

Habasit – Solutions in motion

Head for the peak with HabasitLINK®

HabasitLINK® opens up new perspectives in the domain of ski conveyors. The objective: Greater safety and comfort for the user and enhanced cost-effectiveness for the system operator.

HabasitLINK® modular belts are designed to meet the special requirements of wonder carpet ski conveyors and chairlift in-feed systems.

Product liability, application considerations If the proper selection and application of Habasit products are not recommended by an authorized Habasit sales specialist, the selection and application of Habasit products, including the related area of product safety, are the responsibility of the customer. All indications / information are recommendations and believed to be reliable, but no representations, guarantees, or warranties of any kind are made as to their accuracy or suitability for particular applications. The data provided herein are based on laboratory work with small-scale test equipment, running at standard conditions, and do not necessarily match product performance in industrial use. New knowledge and experiences can lead to modifications and changes within a short time without prior notice. BECAUSE CONDITIONS OF USE ARE OUTSIDE OF HABASIT'S AND ITS AFFILIATED COMPANIES CONTROL, WE CANNOT ASSUME ANY LIABILITY CONCERNING THE SUITABILITY AND PROCESS ABILITY OF THE PRODUCTS MENTIONED HEREIN. THIS ALSO APPLIES TO PROCESS RESULTS / OUTPUT / MANUFACTURING GOODS AS WELL AS TO POSSIBLE DEFECTS, DAMAGES, CONSEQUENTIAL DAMAGES, AND FURTHER-REACHING CONSEQUENCES.

Make your ski conveyor safer and more profitable

Convincing advantages

Operators of ski conveyors have recognized that modular belts offer numerous advantages versus fabric conveyors and rope systems. But even conventional modular belts can be vastly improved. This is why the HabasitLINK® M5015 modular belt was developed. The goal was to achieve greater safety and comfort for the passenger as well as improved profitability for the system operator.

Wonder carpets and chairlift in-feed belts

HabasitLINK® is the optimal solution for wonder carpet ski conveyors and chairlift in-feed belts. With HabasitLINK® solutions, such systems are easier to maintain, simpler to operate, and less prone to damage.

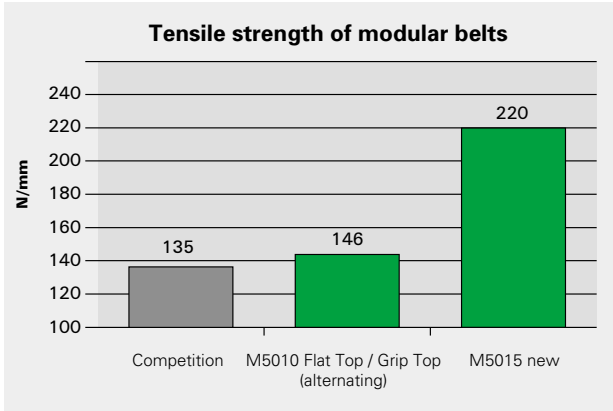

More options due to superior belt strength

HabasitLINK® M5015 is the strongest snow and ice-compatible belt on the market. This entails many real-world advantages and opens totally new dimensions:

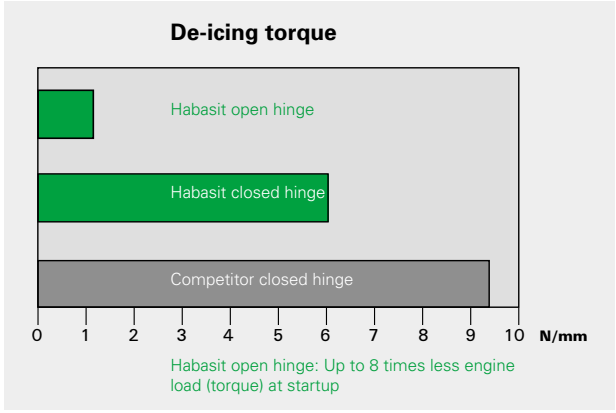

- The construction of extra-long ski conveyors
- Added operating safety and reliability
- Fewer drive stations required
- Terrain-optimized routing

Increased life span and enhanced user safety

- The two-component injection molding process prevents the break-out/detachment of rubber modules
- Increased life span of modular belts and conveyor systems
- Safe operation, no slipping of users on slopes

HabasitLINK® modular belts open up new perspectives

Automatic snow and ice removal

Due to the new and unique hinge design (patent pending), snow and ice are automatically removed from the hinge zones of HabasitLINK® modular belts to prevent ice build-up:

- Reduced workload for operating personnel
- No «roofing» in the belt
- Reduce belt load resulting in increased life span
- No damage of the conveyor system
- Up to eight times less engine load on conveyor startup (torque)

Rod retaining system for easy maintenance

- Simple installation without special tools
- Disassembly within minutes
- Maintenance of the belt without special tools and special skills

Customized design

- Modules can be customized with brand names and logos for effective advertising impact
- Combinations of slip-restraining structures and individual signatures possible
- Application of alignment marks possible by combining different colors

Apart from HabasitLINK® modular belts, Habasit also manufactures special fabric belts for ski conveyors with the following characteristics:

- The special surface texture guarantees high slip resistance even at low temperatures
- No icing possible, the belt remains flexible even at low temperatures
- Effective UV resistance extends the life span of the belts
- Particularly good resistance to ski damage due to durable structure and high cut resistance of the surface
